Tadpole, larval hemoglobin 13
Tannic acid used in embedding procedure, elctron microscopy 223
Terminator codons produced by single point mutations 140
Tetramer(s)
composition in embryo 14
emergence of, in evolution vertebrate hemoglobins 10
to dimers, dissociation from 199
Thalassemia(s) 269, 436, 469
alpha. See Alpha thalassemia
alpha beta 329
beta. See Beta thalassemia
alpha and beta, interactions of 329
clinical manifestations of 329
delta-beta. See Delta-beta thalassemia
gamma delta beta 327
G_γ and $G_\gamma A_\gamma$ $\delta\beta$ 325, 326
G_γ-$\delta\beta$ 369
hemoglobin Lepore 326
heterozygous 465
intermedia(s) 323, 329
bone disease and 329
infections in 329
wasting syndrome in 329
major 323
minor or trait (heterozygous carrier state) 323
oxidative membrane damage in 422
phenotypic variability 324
potassium permeability increased in red cells in 422
prenatal diagnosis of 329
prevention of 329
sickle-beta$^+$ 243
syndromes, defined 323
Vitamin E in 422
Therapeutic effect and delay time of gelation 243
Therapeutic interventions in sickle cell anemia 313
Thiobarbituric acid 375, 378
Thixotropy and gel rheology 215, 216
Tolbutamide and treatment diabetic patients 373, 374
Tomography, computed (CT) with SS children with cerebral infarcts 294
Toxemia, incidence in Hb SS patients 275
Transcription of beta globin in mRNA precursors 351

Transfusion(s) 202, 447-452
exchange 458-460
high level 329
intrauterine 458
neocyte 358, 361
prophylactic, during pregnancy, with sickle hemoglobinopathies 274
requirement 356, 357, 360
therapy 299, 300
Tridecapeptide γCB-3, chemical analysis of in determining number GγAγ chains 30
Triglyceride levels, associated with decrease in glycosylated hemoglobins 379
Tritiated borohydride, treatment with, peptide mapping before and after 374, 375
Tubular model, sickled cells 223
Turbidity and the crystal state of HbS 214. See also Gelation
Twins, identical, and Hb abnormality in diabetes 379

Urea, effects of on delay time of gelation 243, 244, 306, 311
Urea, removal from sickle blood 322

Vaccines, octavalent 285
Vaccines, pneumococcal 285
van der Waal's attraction 2, 433
Vertebrates, hemoglobin evolution in 15
Vibrational stress and unstable hemoglobins 433
Vinyl chains of protophyrin 2
Viral infections and regulatory mechanisms 105
Viscosity 202, 207, 208, 215
Viscous systems, thixotropic, and shearing of gels 215
Vistoplastic states, intermediate, and shearing of gels 215, 216
Vitamin B_{12} deficiency 467
Vitamin E, reduced levels in sickle cell blood 420
Vitamin E in thalassemia 422

Water content, low, in homozygous Hb C cells, and impaired ability to deform 423
Water content, decreased, and therapies 421
Wasting syndromes in thalassemia intermedia 329
Wilson, Bright, Jr. 2

X-ray diffraction spacings and form of sickled cell fibers 223

Yung, Susanna 484

Zeta chain 14, 23-28
Zinc acetate, use to demonstrate instability in hemoglobin 433
